

Newtonian Physics

An Introductory Level Textbook of Physics

For Students

Of The New Millennium,
In Our Solar System

Zafar A. Ismail

AKA

Physicism

Like “imperialism”, “socialism”, “mysticism”, and all other “isms”, physics is also an “ism”: “physicism”. Above all, it is the philosophy and anthropology of “Things” in our universe and concerns itself with their socio-economic structure; yes, the socio-economic structure that has led to the formation of their “culture” (nature), as we find it today.

Dr. Zafar A. Ismail

Anthropology:

*The Merriam Webster Dictionary: “The science of ~~human beings~~-(things) and esp. of their **physical characteristics**, their **origin** and the distribution of ~~raees~~-(kinds: solids, liquids, gases), their **environment** and **social relations**, and their **culture**”*
